SUMMARY

I am a student who's really excited about studying Applied Information Technology. I am getting a Bachelors degree in this field. I have learned the basics of programming and web development. I know how to use them in real life situations. I am good at figuring out problems and paying attention to details. I am someone who learns things quickly. I work well with others. I am good at talking to people. I want to keep learning things and I want to help my company do well in the fast changing world of information technology. I think Applied Information Technology is very important and I want to be good, at it.

WORK EXPERIENCE

Union Bank | Pettah

Feb 2019 - Dec 2020

- I worked with customers to find the banking products for them like savings accounts, fixed deposits and credit cards based on what they needed.
- I had to make sure I sold a number of credit cards and other banking products every month and I was able to do that.
- I looked at each customers information to see if they were eligible for credit and to figure out how credit they should get.
- I helped people apply for credit cards checked their documents and followed up with them to make sure everything was approved on time.

REEBONN LANKA PVT LTD

May 2024 - Dec 2024

- I enter the production data into the company system every day and I make sure it is accurate and on time.
- I keep track of the materials we have the goods that are finished and how much we are producing.
- I check the data for mistakes. I fix any errors I find to make sure everything is correct.
- I make simple reports about production, for the supervisors and the management team to look at.
